***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7, drawn to a sealant.

Group II, claims 8-15, drawn to a sealing method.

Group III, claim 16, drawn to a sealed transparent material.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: the special technical feature common to all the independent claims is a sealant of claim 1, which is shown to be anticipated by JP 59078220 A or Iwahara et al (US 4,904,732). JP 59078220 discloses a sealant comprising a reactive silicon group containing acryl (See Abstract). Iwahara et al discloses a sealant comprising a reactive silicon group containing saturated hydrocarbon based polymer (See Abstract; column 14, line 49). For these reasons the unity does not exist between the groups of claims.

A telephone call was made to Mr. Sheldon I. Landsman on July 14, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
